

BE THE ARTIST

Spider Web Art

Have you looked at spider webs? They are fascinating. Some webs are a very simple weave while others are very complicated.

Supplies

- A branch that has branching
- String, yarn, or thread

Instructions

- **Make a simple zigzag pattern.** Tie the string at one end and zigzag the string back and forth up the branch.
- **Cut the string and repeat the zigzag going up another branch.** Keep doing this until you have the desired effect.
- **You can stop at this point or continue if you want to get fancier.**
- **You can also weave in objects that you collect on your walks.** Feathers and some pretty grass heads are great additions. Flowers and leaves would look good, too. Use your imagination.
